## Seasonal Affective Disorder (SAD)

[www.mayoclinic.org](http://www.mayoclinic.org)

Seasonal affective disorder (SAD) is a type of depression that's related to changes in seasons – SAD begins and ends at about the same times every year. If you're like most people with SAD, your symptoms start in the fall and continue into the winter months; zapping your energy and making you feel moody. Less often, SAD causes depression in the spring or early summer.

Don't brush off that yearly feeling as simply a case of the "winter blues" or a seasonal funk that you have to tough out on your own. Take steps to keep your mood and motivation steady throughout the year.

In most cases, seasonal affective disorder symptoms appear during late fall or early winter and go away during the sunnier days of spring and summer. Less commonly, people with the opposite pattern have symptoms that begin in spring or summer. In either case, symptoms may start out mild and become more severe as the season progresses.

Signs and symptoms of SAD may include:

- Feeling depressed most of the day, nearly every day
- Losing interest in activities you once enjoyed
- Having low energy
- Having problems with sleeping
- Experiencing changes in your appetite or weight
- Feeling sluggish or agitated
- Having difficulty concentrating
- Feeling hopeless, worthless or guilty
- Having frequent thoughts of death or suicide

Products that may help with SADS symptoms:

- Uplifting Essential Oils ie: Wild Orange, Grapefruit, Bergamot, Lime
- Vitamin-D
- B-Complex
- Vitamin-C
- Vita-lea Multivitamin
- Chiropractic Adjustment
- Laughter 😊

## Snow Shoveling

[www.chiropractic.ca](http://www.chiropractic.ca)

Winter weather can pack a punch and, with the season's heavy snowfalls, injuries often result. Improper snow shoveling is often to blame.

But shoveling out after a storm doesn't have to leave you stiff and sore. With a little know-how, you can clear your driveway without the all-too-common back, neck and shoulder pain cramping your style. Here's how:

### **PUSH, DON'T THROW.**

Push the snow to one side and avoid throwing it. If you must throw it, avoid twisting and turning – position yourself to throw straight at the snow pile.

### **BEND YOUR KNEES.**

Use your knees, leg and arm muscles to do the pushing and lifting while keeping your back straight.

### **WATCH FOR ICE.**

Be careful on icy walkways and slippery surfaces. Intermittent thaws and subsequent freezing can lead to ice building up underfoot, resulting in nasty slips and falls. Throw down some salt or sand to ensure you have a good footing.

Once you've mastered safe snow shoveling techniques, you'll be free to have fun and stay fit all winter.

Remember to do knee to check exercises every night and to use ice for aches and heat for stiffness.

**\*\* Always remember to get adjusted regularly!**
