**Do you want to function at your best and maximize your quality of life by getting back to the activities you love?**

**Low-Level Laser Therapy (LLLT)** could be the answer for you! LLLT is a painless service that is both safe and effective. Our laser appointments are less than 15 minutes and work well with or without chiropractic.

**At the Chiropractic Care & Longevity Center we have two Cold Lasers:**

1. **RX-1:** A stand alone device made up of a single large lamp that allows us to focus on major areas of the body.
2. **PL-Touch:** A dual head laser that allows us to focus on several areas during each treatment.

**Ask your Doctor of Chiropractic how Low-Level Laser Therapy may help you!**

**What are the benefits? LLLT may:**

- **Speed up tissue repair and promote healing.**
- **Increase blood supply and circulation.**
- **Reduce acute or chronic pain.**
- **Decrease swelling and inflammation.**
- **Stimulate nerve function.**
- **Promote collagen and muscle tissue development.**
